

6 Way Power Seat Base

The B & D Independence Company 6 way power seat base is designed to make transferring possible in the lowered floor minivan or a full sized van conversion. When used with the factory power 6-way seat or the after market 6-way power unit, it gives the individual control of infinite adjustment to the seat position for driving and transferring.

Exclusive Features:

- B Pillar- lower offset wiring swivel pivot promotes rigidity and B pillar clearance.
- Quick Mount- the quick mount design uses floor strikers and installation in 30 mins max including electric.
- Footrest to allow convenient foot placement during the transition from the driving position to the transfer position.

More Features:

- Central wiring routing including OEW seat harness
- Manual dual motor release permits movement such as forward and reverse and swivel left and right for ease of installation as well as in case of power failure
- Stationary footrest stays against firewall to allow proper placement of foot to the break and gas pedals.
