BRAUNABILITY ADA Entervan

The Braun ADA Entervan is the culmination of nearly forty years experience in building personal mobility products. Style, performance, convenience and safety have been aesthetically blended to achieve a new level of refinement in a wheelchair-accessible minivan.

The most striking feature is its handsomely finished automotive look. Easy access to the vehicle is achieved with a lowered floor and low angle ramp. Both the passenger side and the driver side sliding doors have been lowered to match the low floor level with no sill or other obstructions to step over. This standard feature also allows for a better wheelchair turning radius, making it easier to maneuver while inside the vehicle.

The ADA Entervan comes standard with a removable front driver and passenger seat, and a wheelchair securement position in the front passenger area. This allows a passenger to ride in the front passenger seat or, by simply removing the seat, to ride in their wheelchair.

Manual Door

The ADA Entervan features ADA compliant manual driver and passenger sliding door with 56-1/4” vertical opening.

Manual Ramp

The 30” wide aluminum foldout ramp makes it easy to load and unload wheelchair users. The ramp swingout feature allows for easy ambulatory access to the vehicle.
