

## Carony Transportation System

This revolutionary system transforms an automotive seat into a wheelchair. The end user simply glides from the vehicle onto the wheeled base, remaining seated the whole time. No more lifting for the caregiver! The Carony system operates in conjunction with a Bruno Turny™ or Turnout™. Ride safely in an automotive seat secured with the vehicle's seatbelt!

### Highlights:

- Eliminates lifting or transferring by the caregiver
- User weight capacity of 220 lb/100 kg
- Safe - uses automotive seat and seat belt (no need to travel sitting in a wheelchair); meets or exceeds all applicable Federal Motor Vehicle Safety Standards
- Requires a Turny™ or Turnout™
- No structural modifications to your vehicle - will not affect resale
- Can reinstall in your next vehicle
- Works with minivans, pickup trucks, SUVs, CUVs, full-size vans and sedans - first and second row applications available
- Available with 12 in or 24 in rear wheels
- Seat has removable inserts to accommodate different seating
- Sales, installation and service provided by our factory-trained technicians
