

Companion Seat

The Companion Seat is designed for installation in Chrysler, Ford and GM minivans. Using the original vehicle seat, the unique power base extends out the door twenty inches and tilts forward a full six inches to make boarding safe and easy. A hand-held control with a single toggle switch controls the automatic functions, allowing the passenger or an attendant to operate the seat.

Safety has always been a top priority at Braun. That's why the Companion Seat has been thoroughly tested to meet all applicable Federal Motor Vehicle Safety Standards. And to support the quality craftsmanship further, Braun offers the Three-Year Limited Warranty – the best the industry has to offer.

Over 30 years of experience and expertise go into every Braun product and the Companion Seat is no exception. The Companion Seat is the perfect companion, and the perfect solution.
Specifications
