

## Extension Controls

**Our control extensions, pedal extensions and key adapters make everyday tasks convenient for you - from turning the ignition to setting the parking brake.**

Gas & Brake Pedal Extenders

Extending the gas or brake pedal of your vehicle isn't just about comfort, but safety as well. To reduce the risk of serious injury from airbag inflation, there should be at least 10" in between the driver and steering wheel. Our gas and brake pedal extenders will allow you to drive your vehicle safely and comfortably.
