

L Track

L-Track is the most widely used floor anchorage in the transportation industry due to its flexibility in accommodating various wheelchair positions. Q'Strain also uses a different alloy to provide you with superior strength, corrosion resistance.

Features and Benefits:

- Application:
Flexible securement position
- Durable - Constructed from 6351-T6 aluminum alloy; superior corrosion resistance versus standard 6061-T6
- Multiple Profiles - To suit your specific application
- Multiple Lengths & Drilling Patterns - Contact us for information on special lengths and drilling patterns
- Compatible with any L-Track fitting for: QRT, Q-5000 & M-Series systems, and all Seat Anchor Systems.

Our L-Track is available in 3 different profiles:

	Flanged for flush mounted installations
	Surface Rail for surface mounted installations
	Regular (non-flanged) for surface or flush mounted installations
